

Akhil S Naik

Senior Member of Technical Staff — Salesforce (MuleSoft)

akhilsnaikk@gmail.com | +91 7907412471 | +91 9916872072 | linkedin.com/in/akhilsnaik | github.com/akhilsnaik | Bengaluru, India

SUMMARY

Senior engineer with 12+ years building full-stack Java and JavaScript applications. Currently building and supporting Mule connectors on the Customer-Centric Engineering team at Salesforce (MuleSoft). Previously spent 7 years at Cloudera/Hortonworks working on the Apache Hadoop ecosystem — committer on Apache Ambari and Apache Hue, contributor to Apache Zeppelin.

EXPERIENCE

Senior Member of Technical Staff — Customer-Centric Engineering

Salesforce (MuleSoft) • Feb 2024 – Present • Bengaluru, India

- Build and support Mule connectors on the Customer-Centric Engineering team at MuleSoft.
- Work directly on issues affecting customer integrations, contributing to customer success and connector reliability.

Senior Staff Software Engineer — Backline Team

Cloudera Data Platform • Jan 2019 – Feb 2024

- Backline engineer for Apache Ambari, Apache Hue, and Cloudera Manager — analyzed and resolved customer-reported issues across the cluster management stack.
- Committer on Apache Ambari and Apache Hue (Apache Software Foundation); active in code review and issue triage for the Hue open-source community.
- UI developer for supportmatrix.cloudera.com, which surfaces product compatibility across Cloudera distributions.
- On-call for critical/hot issues including cluster upgrades; wrote troubleshooting guides and mentored customer-facing engineers.

Staff Software Engineer — Break/Fix & Automation

Hortonworks Data Platform • May 2017 – Jan 2019

- Subject-matter expert for customer-reported issues on Apache Ambari, shipping hotfixes and features on top of the open-source codebase.
- Code contributor to Apache Ambari, Apache Zeppelin, YARN UI, Tez View, Hive Views, and the HDFS Files View.
- UI engineer for Hortonworks automation initiatives, the Support Matrix project, and the SmartSearch diagnostics tool.

Software Development Engineer → Senior SDE

Huawei Technologies • Dec 2012 – May 2017

- Built a web client for Huawei's OSS platform used by telecom operators worldwide: network element management, system monitoring, and alarm handling.
- Implemented topology visualization for entire network layouts using HTML5 Canvas.

OPEN SOURCE

- **Apache Ambari** — Committer, Apache Software Foundation
- **Apache Hue** — Committer
- **Apache Zeppelin** — Contributor (also: YARN UI, Tez View, Hive Views, HDFS Files View)
